Management Discussion and Analysis Report

INDUSTRY STRUCTURE

Dyes and dye intermediates industry is an important sector of the Indian chemical industry. This sector has grown at a very fast pace after independence and nearly half of its production is being exported today. India is now the second largest producer of dyes and intermediaries in Asia. A remarkable feature of the Indian dyestuff industry is the co-existence of units in the small, medium and large sectors, actively involved in the manufacture of dyestuffs and their intermediates. The industry is characterized by the co-existence of a small number of players in the organized sector (around 50 units) and a large number of small manufacturers (around 11,000 units) in the unorganized sector. The distribution of these units is skewed towards western region (Maharashtra and Gujarat) accounting about 90%. In fact, nearly 80% of the total capacity is in Gujarat, where there are nearly 750 units.

The growth of dye sector in the future continues to depend on the performance of end user industries like paints, textiles, printing inks, paper, plastics and foodstuffs. The changing customer preferences, boom and expansion of infrastructure in certain parts of the world creates new market opportunities for the dye industry. To achieve global standards the industry needs to put efforts in critical areas so as to achieve aggressive growth and focus on exports, R&D, co-marketing alliances, up-gradation of manufacturing facility, contract manufacturing with companies having established markets, identification of areas of core competence, consolidation, collaboration by cluster development, outsourcing, environmental consciousness, cost reduction etc. The industry is likely to see many new dyeing technologies coming into the market with the help of good technical expertise and R&D achievements. Globally the high usage of cotton, polyester and the banned vat and azo dyes in some of the countries has paved the way for reactive and disperse dyes. It is expected that in future these two dyes would lead the market. The Industry feels unless the labour laws, power supply and infrastructure are improved, it would be very difficult to compete globally with rapidly declining duty and appreciation in the value of rupee.

With Government of India promoting Make in India project, such an initiative will lower the dependency of importing raw materials and purchasing the required raw materials will help companies to lower manufacturing costs and will help to offer goods at competitive rates.

OPPORTUNITIES, THREATS, RISKS AND CONCERNS

a) OPPORTUNITY IN THE INDUSTRY

Export opportunities created by the closure of several units in countries like USA and Europe due to enforcement of strict pollution control norms, has resulted in a spurt of capacity building in India.

There is a lot of scope of growth in the dyestuff industry with emphasis laid on research and development activities.

Stricter law implementation in major competitor country China leading to closure of certain dyestuff and chemical units has resulted in creation of temporary demand for Indian products. Such situations brings in an opportunity for Indian Companies to tap the market and create a niche for themselves in the world market.

A large population, huge domestic market dependence on agriculture and strong export demand are the key growth drivers for the industry.

A global shift towards Asia as the world's chemicals manufacturing hub is a positive sign indicating growth of the industry in India. Per capita consumption of chemicals in India is lower as compared to western countries, so immense scope for new investments. Rise in GDP and purchasing power generates huge growth potential for the domestic market. Low cost manufacturing.

b) THREATS, RISKS AND CONCERNS IN THE INDUSTRY

Since majority of dyestuffs are commodities there is not much product differentiation & duplication of products is easy. The market faces moderate risks related to dependency on export revenue mix, competitive pressures from China, high concentration of SMEs with negligible compliance with changing EU export dynamics and obsolete production technologies used by majority of SMEs in Gujarat and Maharashtra states hampering long-term growth prospects of India's dyes and pigments stakeholders.

The dyestuff industry faces volatility in the price of inputs and the volatility of the Rupee vis a vis the US Dollar which is a matter of concern and is required to be tackled.

Any regulatory change in the government policies, local environment regulations and changes in duties and tax, increase in interest rate due to inflation pressure may affect our business operations, financial performance and future growth.

SEGMENT WISE OR PRODUCT WISE PERFORMANCE

Under Dyestuff category – Company offers range of Reactive, Disperse, Acid Dyestuff products which are in line with the product of multinationals companies. Our presence in dyestuff market is for more than 40 years.

INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY

The details of Internal Control Systems and their adequacy have already been discussed in the Board's Report under the title Internal Financial Controls.

DISCUSSION ON FINANCIAL PERFORMANCE WITH RESPECT TO OPERATIONAL PERFORMANCE

(₹. in Lacs)

Particulars	Year ended March 31, 2016	Year ended March 31, 2015	%Increase /decrease
Revenue from Operations	82.17	82.96	(0.95)

Loss after tax	(92.24)	(108.13)	(14.23)

OUTLOOK

The markets look positive and encouraging for the dyes and organic pigment segment. There is an expected growth of 6% per year. There are various contributory factors for such growth like Expansion of the middle class, particularly in the Asia Pacific and Africa-Mideast regions, which is accelerating global consumer spending, which is beneficial to the dye and organic pigment markets such as textiles and plastic product. It is also estimated that dyes and organic pigment consumption will remain concentrated in the Asia Pacific region, where the majority of world textile and consumer plastic product production occurs. While China still remains the dominant global consumer of dyes and organic pigments, rapid growth will also be experienced in smaller Asian markets such as Bangladesh, India and Vietnam as textile and plastic producers continue to move production to countries with the lowest labour costs. Additionally, consumer preferences for new, unusual textile colours - that do not fade and yet are environmentally friendly - will boost growth in value demand as textile producers increasingly turn to these newer, higher value products. Rising consumer spending will drive increased demand for organic colorants in textiles and plastics, while strong growth in global construction activity will boost demand in paints and coatings. Increase in value demand will reflect the growing importance of expensive, higher value dyes and pigments that meet increasingly stringent performance standards and preferences for more environmentally friendly products. Despite the healthy growth, even faster advances will be limited by a moderation in global vehicle production and slow growth in printing inks due to the challenges facing the print media industry.

Annexure - B to the Auditors' Report

Report on the Internal Financial Controls under Clause (j) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of JD ORGOCHEM LIMITED ("the Company") as of March 31, 2016 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A Company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2016, based

on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.
